CONTENTS

Volume 48, Issue Nos. 1–12 (2000)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

Dynamic stiffness of infinite Timoshenko beam on viscoelastic foundation in moving co-ordinate: Y.-H. Chen and Y.-H. Huang 1

Explicit and implicit meshless methods for linear advection–diffusion-type partial differential equations: M. Zerroukat, K. Djidjeli and A. Charafi 19

Study of shrinkage stresses for drying of brick as a conjugate problem: K. Murugesan, K. N. Seetharamu, P. A. Aswatha Narayana, H. R. Thomas and W. J. Ferguson . . 37

An efficient method for solving implicit and explicit stiff differential equations: H. Pasic 55

A stabilization technique to avoid hourglassing in finite elasticity: S. Reese and P. Wriggers 79

Flux and traction boundary elements without hypersingular or strongly singular integrals: J. Dominguez, M. P. Ariza and R. Gallego 111

Chaotic descent method and fractal conjecture: V. Jovanovic 137

ANNOUNCEMENT 153

CONFERENCE DIARY 154

Issue No. 2

Numerical differentiation for non-trivial consistent tangent matrices: an application to the MRS-Lade model: A. Pérez-Foguet, A. Rodríguez-Ferran and A. Huerta 159

A simple approach towards fully stressed design in hyperelasticity exploiting the isoparametric finite element concept: E. Kirchner and R. Immel 185

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services: Abstract Jnl. in Earthquake Engineering, Applied Mechanics Reviews, BHRA Fluid Engineering Centre, Boundary Elements Communications, CITIS–Civil Engineering Abstracts, Compumath Citation (ISI), Current Contents/Engineering, Computing & Technology (ISI), Engineering Index Inc, Eng. Societies Library, Fluid Abstracts and FLUIDEX, Geodex, Geotechnical Abstracts, Indian Society of Earthquake Technology, INSPEC, Int. Petroleum Abstracts, Materials Information, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, Newsletter of Engineering Analysis Software, PASCAL, Research Alert (ISI), Science Citation Index (ISI), SCISEARCH Database (ISI), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik.

Boundary element analysis of three-dimensional cracks in anisotropic solids: E. Pan and F. G. Yuan 211

An object-oriented framework for the implementation of adjoint techniques in the design and control of complex continuum systems: R. Sampath and N. Zabaras . . 239

Application of the finite volume method and unstructured meshes to linear elasticity: H. Jasak and H. G. Weller 267

The mathematical shell model underlying general shell elements: D. Chapelle and K. J. Bathe 289

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 3 . . . 315

Issue No. 3

A numerical strategy for finite element analysis of no-tension materials: G. Alfano, L. Rosati and N. Valoroso 317

Design sensitivity analysis and optimization of non-linear transient dynamics. Part I—sizing design: S. Cho and K. K. Choi 351

Design sensitivity analysis and optimization of non-linear transient dynamics. Part II—configuration design: S. Cho and K. K. Choi 375

Achieving finite element mesh quality via optimization of the Jacobian matrix norm and associated quantities. Part I—a framework for surface mesh optimization: P. M. Knupp 401

Optimum design of truss structures undergoing large deflections subject to a system stability constraint: R. Sedaghati and B. Tabarrok 421

Re-visiting the contact patch test: M. A. Crisfield 435

Explicit form and efficient computation of MLS shape functions and their derivatives: P. Breitkopf, A. Rassineux, G. Touzot and P. Villon 451

TECHNICAL NOTE
A note on finite element implementation of sandwich shell homogenization: R. Tanov and A. Tabiei 467

Issue No. 4

An implicit multi-material Eulerian formulation: D. J. Benson 475

Contact search strategies for FEM simulation of the blow molding process: S. Wang and A. Makinouchi 501

A parallel multipolar indirect boundary element method for the Neumann interior Stokes flow problem: J. E. Gómez and H. Power 523

A hybrid stress ANS solid-shell element and its generalization for smart structure modelling. Part I—solid shell element formulation: K. Y. Sze and L. Q. Yao 545

A hybrid stress ANS solid-shell element and its generalization for smart structure modelling. Part II—smart structure modelling: K. Y. Sze, L. Q. Yao and S. Yi 565

On the use of bubble functions in the local buckling analysis of plate structures by the spline finite strip method: M. Azhari, S. Hoshdar and M. A. Bradford 583

An iterative method for coupling of deformation and failure mechanisms on different length scales: H.-P. Gänser, F. D. Fischer and E. A. Werner 595

Simulation of a premixed turbulent flame with the discrete vortex method: C. K. Chan, K. S. Lau and B. L. Zhang 613

CONFERENCE DIARY 629

Issue No. 5

Symmetric coupling of multi-zone curved Galerkin boundary elements with finite elements in elasticity: S. Ganguly, J. B. Layton and C. Balakrishna 633

A method for connecting dissimilar finite element meshes in two dimensions: C. R. Dohrmann, S. W. Key and M. W. Heinstein 655

A continuum Lagrangian sensitivity analysis for metal forming processes with applications to die design problems: N. Zabaras, Y. Bao, A. Srikanth and W. G. Frazier . . . 679

Toward the kernel of the vector epsilon algorithm: J. A. Steele and A. T. Dolovich . . . 721

A deep rod finite element for structural dynamics and wave propagation problems: S. Gopalakrishnan 731

Inf-sup testing of upwind methods: K. J. Bathe, D. Hendriana, F. Brezzi and G. Sangalli 745

Fractional step methods for thermo-mechanical damage analyses at transient elevated temperatures: J. Stabler and G. Baker 761

BOOK REVIEW 787

CALL FOR PAPERS. 788

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 4 789

Issue No. 6

Unconditionally energy stable implicit time integration: application to multibody system analysis and design: S. Chen, D. A. Tortorelli and J. M. Hansen 791

Boundary integral equation solution of three-dimensional elastostatic problems in transversely isotropic solids using closed-form displacement fundamental solutions: M. Loloi 823

Multilayered shell finite element with interlaminar continuous shear stresses: a refinement of the Reissner–Mindlin formulation: B. Brank and E. Carrera 843

On stabilization of the CBS algorithm: internal and external time steps: P. Nitiarasu and O. C. Zienkiewicz 875

Numerical method for the solution of non-linear two-dimensional inverse heat conduction problem using unstructured meshes: P.Duda and J. Taler 881

Fluid–membrane interaction based on the material point method: A. R. York II, D. Sulsky and and H. L. Schreyer 901

A family of second-order boundary dampers for finite element analysis of two and three-dimensional problems in transient exterior acoustics: K. G. Manoj and S. K. Bhattacharyya 925

Issue No. 7

Error estimation of quadrature rules for evaluating singular integrals in boundary element problems: P. R. Johnston and D. Elliott 949

Three-dimensional finite-element simulation of the dynamic Brazilian tests on concrete cylinders: G. Ruiz, M. Ortiz and A. Pandolfi 963

Boundary element hyper-singular formulation for elastoplastic contact problems: M. H. Aliabadi and D. Martin 995

An inverse finite-element algorithm for parameter identification of thermoelastic damage models: R. Mahnken 1015

The numerical analysis of dynamically loaded ceramic: a crack softening approach: P. J. Hazell and M. J. Iremonger 1037

Hybrid stress tetrahedral elements with Allman's rotational D.O.F.s: K. Y. Sze and Y. S. Pan 1055

BEM for crack-inclusion problems of plane thermopiezoelectric solids: Q. H. Qin and M. Lu 1071

Mismatching refinement with domain decomposition for the analysis of steady-state metal forming process: K. Park and D. Y. Yang 1089

Issue No. 8

Plane stress and plate bending coupling in BEM analysis of shallow shells: P. H. Wen, M. H. Aliabadi and A. Young 1107

A yield-limited Lagrange multiplier formulation for frictional contact: R. E. Jones and P. Papadopoulos 1127

Multipoint approximation development: thermal structural optimization case study: S. Xu and R. V. Grandhi 1151

Achieving finite element mesh quality via optimization of the Jacobian matrix norm and associated quantities. Part II—A framework for volume mesh optimization and the condition number of the Jacobian matrix: P. M. Knupp 1165

A quasi-interpolation method for solving stiff ordinary differential equations: Y. C. Hon and Z. Wu. 1187

The 3-D BEM implementation of a numerical Green's function for fracture mechanics applications: G. S. Castor and J. C. F. Telles 1199

Tuned vibration control of overhead line conductors: A. Tesar and J. Kuglerova 1215

Parallel multigrid solvers for 3D unstructured finite element problems in large deformation elasticity and plasticity: M. F. Adams 1241

CALL FOR PAPERS. 1263

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 5 1264

Issue No. 9

Optimization of fibrous laminates undergoing progressive damage: V. B. Hammer. . . 1265

Numerical simulations of strain localization in inelastic solids using mesh-free methods: S. Li and W. K. Liu. 1285

Computational visco-plasticity for kinematically constrained crystals: J. A. W. van Dommelen, W. A. M. Brekelmans and F. P. T. Baaijens 1311

A Galerkin boundary element formulation with dual reciprocity for elastodynamics: J. J. Pérez-Gavilán and M. H. Aliabadi. 1331

Optimization of geometrically non-linear symmetric systems with coincident critical points: M. Ohsaki 1345

A unified stability analysis of meshless particle methods: T. Belytschko, Y. Guo, W. K. Liu and S. P. Xiao. 1359

Analytical study and numerical experiments for true and spurious eigensolutions of a circular cavity using the real-part dual BEM: S. R. Kuo, J. T. Chen and C. X. Huang. . 1401

Issue No. 10

A new finite point generation scheme using metric specifications: C. K. Lee. 1423

Normalized SPH with stress points: P. W. Randles and L. D. Libersky 1445

Topology optimization in magnetic fields using the homogenization design method: J. Yoo and N. Kikuchi. 1463

A compliant track link model for high-speed, high-mobility tracked vehicles: H. S. Ryu, D. S. Bae, J. H. Choi and A. A. Shabana. 1481

Moving least-squares particle hydrodynamics II: conservation and boundaries: G. A. Dilts . . . 1503

A mortar-finite element formulation for frictional contact problems: T. W. McDevitt and T. A. Laursen . . . 1525

Issue No. 11

Extended finite element method for three-dimensional crack modelling: N. Sukumar, N. Moës, B. Moran and T. Belytschko . . . 1549

Adaptive mesh generation based on multi-resolution quadtree representation: A. Fischer and P. Z. Bar-Yoseph . . . 1571

Derivation of feasibility conditions in engineering problems under parametric inequality constraints with classical Fourier elimination: N. I. Ioakimidis . . . 1583

Efficient runner networks for investment castings: R. C. Givler and D. B. Saylors . . . 1601

Enrichment and coupling of the finite element and meshless methods: A. Huerta and Sonia Fernández-Méndez . . . 1615

A benchmark study of reduced-strain shell finite elements: quadratic schemes: M. Malinen and J. Pitkäranta . . . 1637

CONTENTS LISTING
Communications in Numerical Methods in Engineering, Volume 16, Number 6 . . . 1673

Issue No. 12

Theory and numerics of three-dimensional beams with elastoplastic material behaviour: F. Gruttmann, R. Sauer and W. Wagner . . . 1675

The generalized differential quadrature method for frequency analysis of a rotating conical shell with initial pressure: Li Hua and K. Y. Lam . . . 1703

An accurate solution for the responses of circular curved beams subjected to a moving load: C. S. Huang, Y. P. Tseng and C. L. Hung . . . 1723

Arbitrary branched and intersecting cracks with the extended finite element method: C. Daux, N. Moës, J. Dolbow, N. Sukumar and T. Belytschko . . . 1741

Dual methods for discrete structural optimization problems: M. Beckers . . . 1761
